

## Letter of Endorsement to “The Family of Israel Foundation”

February 3, 2020,

This letter of endorsement confirms the Gush Etzion Regional Council’s decision to allow “The Family of Israel Foundation” led by Prof. Pinchas & Keren-Or Mandell to undertake and implement the “Proof of Concept” pilot project of constructing “Isotopic Homes™” & Communities as presented by the foundation in its video presentation.

This council has agreed to allow The Family of Israel Foundation to build this pilot project at the Kashuela farm, which is owned by Mr. Yair Ben-David in the community of Gevaot. The council requires that all aspects of this project including implementation adhere to the laws of the State of Israel.

The council will provide assistance and support in cooperating and collaborating with the foundation to make this project a reality. However, the council will not be offering any direct financial support; which will be the responsibility of the foundation to secure from other sources.

The council wishes to bless The Family of Israel Foundation and this important project with great success, and encourages all lovers of Israel around the world, who wish to be a part in helping fulfill the Biblical prophecies of assisting in the return and resettlement of the Jewish people to their ancestral homeland and ultimate redemption, to support this project generously.

Sincerely,

  
Shlomo Ne'eman

Mayor

Regional Council, Gush Etzion
